CCDDN: Transitioning of an Era

After successfully operating for many years, the Civil Citation Diversion & Deflection Network is transitioning. It is minimally in the works to transfer their resource-rich website to another organization to remain available to all who work in the field of deflection and pre-arrest diversion.

We believe we have provided you with a strong foundation of information, technical assistance and training for your deflection and pre-arrest programs via in-person consultation, various presentations, articles, the deflection implementation guide we have written and our website.

Congratulations are in order for Tom Olk, CEO, on his "retirement!" (Those of us who know Tom, know he'll never fully retire...)

Ms. Duncan will continue working in the field in a SME/Consultant role and may be reached via LinkedIn or pdun16@hotmail.com
